

## EDUCATION

---

- **Dual Study on Hochschule für Telekommunikation Leipzig** Leipzig, Germany  
*Bachelor of Science in Computer Science (Thesis about Machine Learning and BLE Proximity)* 2017 - 2020
- **Allgemeine Hochschulreife on Melanchthon Gymnasium** Berlin, Germany  
*Awarded 3rd place in the Informatikbiber competition* 2011-2017

## EXPERIENCE

---

- **Deutsche Telekom** Berlin, Germany  
*Fullstack Softwarearchitect* 2017 - Present
  - **From Monolith to Microservices:** The customer wanted to migrate from a full monolith application to a microservice architecture. A micro frontend and backend architecture allows the developers to freely add and scale their services. I had a major impact and responsibility of designing a micro frontend and backend architecture for easy scaling, maintaining, and monitoring. (*Webpack, TypeScript, Java, Hibernate, SQL, Lit, Vue*)
  - **Situational Awareness Dashboard:** Designing and developing a situational awareness dashboard with realtime functionality and efficient calculation of further events and KPIs. (*Java, SpringBoot, Scala, Angular, TypeScript*)
  - **Real time Indoor Tracking:** Fullstack development on a real time asset indoor tracking service including UWB, LTE, and BLE. (*Java, SpringBoot, Scala, Angular*)
  - **Pairing Android App:** Designing and developing an android app that allows to pair a Bluetooth Low Energy Beacon with a QR-Code. (*Kotlin, SQL*)
- **Company Consulting Team** Berlin, Germany  
*IT Consultant* 2019 - 2021
  - **Inhouse HR-Tool:** Designing and developing a fully functional HR-Tool to see all employees, their skills, and experience. (*Vue, TypeScript, C*)
  - **Inhouse Polling Tool:** Fullstack developed polling tool for voting directly in real time in meetings allowing to make easier decisions. (*Vue, TypeScript, Node.js*)
  - **Landing Page:** Developing a landing page for a real estate company to attract and maintain customers. (*React, TypeScript, Tailwind*)
  - **Merging and Analyzing Data:** Data Science project I was involved in merging and analyzing different data sources. (*Python*)

## PROJECTS

---

- **Todoover:** A fully functional weekly planer web application for easier managing your tasks and deadlines. (*Vue, TypeScript, Node.js, Postgres, Prisma, GraphQL*)
- **Insta-Clone:** Scalable instagram clone powered by microservices. (*React, TypeScript, Go, gRPC*)
- **Vue Cirrus:** Open Source Vue component library for the Cirrus CSS framework. (*Vue, JavaScript, CSS*)
- **Fake Graph:** A fake GraphQL server for practicing using GraphQL. (*GraphQL, TypeScript, TypeORM*)

## PROGRAMMING SKILLS

---

- **Languages:** TypeScript, Javascript, Go, SQL, C++, Java, Scala, Swift, Solidity
- **Technologies:** AWS, React, Vue, Angular, Blockchain, SpringBoot, Node.js, Electron, Docker

## CERTIFICATIONS, TALKS, AND AWARDS

---

- **STARTHACK Hackathon:** Won the first price on a challenge. Final product was a interactive map where residents of Switzerland could post infrastructure improvements.
- **Talk: Applications of GPT-3:** Invited by DLR to give a keynote presentation regarding the applications in software development of the language model GPT-3.
- **Talk: What does the future of artificial intelligence look like?:** ClubHouse conversation about the future of artificial intelligence.
- **Talk: What is artificial intelligence?:** Twenty minute talk about what artificial intelligence is and is not.
- **Udacity Data Engineering:** Design data models, build data warehouses, data lakes, and automate data pipelines.
- **Udacity Intro Self-Driving Cars:** Fundamentals of self-driving cars, Python, apply C++, and computer vision.
